*   -Must choose a font for pdf outcome*
* -[Control+h] = Hide Parent button*
*   -To hide any parent row and all it's child rows*
*   -Is not saved to a file, but just display and save pdf purpose*
*   -A json file is created for remembering the rows that are hidden*
*   -As long as the json file is not deleted, most functions are locked (unable to edit orginal file)*
* -[Control+a] = radios button (parent, child)*
*   -Switching between Parent and Child radio button for positioning*
* -[Control+e] = Paste button*
*   -Choose a row and paste the words to entry box to be fix*
*   -Press [Control+w] to write back to its position*
* -[Control+y] = Checked button*
*   -To strikethrough any row (eg. for finished a task)*
*   -WARNING:*

-Not all computer has same encoding system; if it's not 'utf-8', the Checked button will be unabled
-Do not save to pdf with strikethrough rows, because the result will be unsatisfying
-Better use Delete function to clear-up unwanted rows (always backup beforehand)
-[Control+o] = Space button
-The function mostly used on background (for displaying purpose)
-Not much of a use at this point
-Helpful for clearing chosen higlighted row in list box
-Helpful for avoiding any mistaken editing
-[Control+minus = ('-')] = Clear Hide
-Unhide collections of hidden parent one at a time
-Can delete the whole json file so that appear all at once
-[Control+Left/Right/Up/Down]
